

# Castle and Hightae Lochs L N R Wildlife 2009

Once again the year started wet and cold with some flooding in the sanctuary zone to the east of the Valison Burn. The weather became drier from February through to May with temperatures rarely reaching 10C until the last week. June and July were relatively cool and August was the wettest on record with considerable flooding lasting for some days. The floods cleared in September and October only to return in November; another record making month for rainfall which left the lochs and their surrounding areas severely flooded. December was cold with large parts of both lochs frozen towards the end of the month. The generally high level of the water throughout the year meant that areas of mud around the fringes of the Loch were rarely exposed and passage wader sightings have suffered accordingly. Frequent sudden rises in water levels have caused problems for some nesting birds and mammals.

The woodland to the east of Hightae Loch was clearfelled during the year and this has produced a major change in the habitat as well as causing some disturbance whilst the work was taking place. It will be interesting to see how these changes affect the wildlife in the future.

This report is based on the WeBS counts conducted each month throughout the year by Andy Riches (AR) and additional records from other visits and observers. Many thanks to the following Colin & Angie Bushell (CB), Ross Gemmell (RG), Susan Jones (SJ), Michael Granger (MG), Brian Henderson (BH), Richard and Barbara Mearns (R&BM), John Miles (JM), John Mills (JML), Tristan Reid (TR), James Towill (JT), Anna White (AW) and Dawn Wright (DW). Some old records have initials for the recorders: Iain Anderson (IA), Stuart Graham (SG), Paul Seddon (PSed), Freda Seddon (FSe).

In addition to providing his records, Richard Mearns has provided historical information, support and advice without which this report would not exist.

The descriptions of status refer to status on the reserve only.

**Species recorded in 2009 are listed in bold type.**

## MAMMALS.

**SOPRANO PIPISTRELLE BAT:** *Present throughout the year and probably breeds.*

**COMMON PIPISTRELLE BAT:** *Present throughout the year and probably breeds.*

**DAUBENTON'S BAT:** *Present throughout the year and probably breeds.*

**NOCTULE BAT:** *Reported occasionally from Hightae Loch. Numbers reported are declining since 2002 when at least 22 were noted on 28<sup>th</sup> May. This may simply be due to lack of observers. Last record 18<sup>th</sup> July 2006 (R&BM).*

**PIGMY SHREW:** *Present throughout the year and breeds.*

**COMMON SHREW:** *Present throughout the year and breeds.*

**WATER SHREW:** *Present throughout the year and probably breeds.*

**WOOD MOUSE:** *Present throughout the year and breeds.*

**FIELD VOLE:** *Present throughout the year and breeds.*

**BANK VOLE:** *Present in the Castle Woodland and breeds.*

**BROWN RAT:** *Present throughout the year and breeds.*

**RED SQUIRREL:** *Seen in woodland at both Castle and Hightae Lochs. Maximum count: 6 at Castle Loch on 18<sup>th</sup> December (RG, BH, AR).*

**WEASEL:** *Present throughout the year and probably breeds.*

**STOAT:** *Present throughout the year and probably breeds.*

**AMERICAN MINK:** *Present throughout the year and breeds. Apparent increase in numbers this year. A number of sightings of females with young especially in the Vendace Burn area.*

**OTTER:** *Present throughout the year and breeds. Many sightings at both lochs by a number of observers.*

**BADGER:** *Often present in Hightae Woodland prior to the clearfell. Occasionally visits Castle Loch.*

**RED FOX:** *Often present in Hightae Woodland prior to the clearfell and adjacent to the Castle Loch Woodland.*

**ROE DEER:** *Often present in Hightae Woodland prior to the clearfell and adjacent to the Castle Loch.*

## **DRAGONFLIES.**

**LARGE RED DAMSELFLY:** *Present and breeds. Stronghold on the Valison Burn. Maximum number recorded: 18 adults, 7 pairs copulating and 4 females ovipositing at Castle Loch and 4 adults and 2 pairs copulating at Hightae Loch (AR&SJ).*

**BLUE-TAILED DAMSELFLY:** *Present and breeds. Stronghold on the Valison Burn. Maximum numbers: 120 adults, 30 pairs copulating and 23 females ovipositing at Castle Loch and 49 adults, 12 pairs copulating and 5 females ovipositing at Hightae Loch (AR&SJ).*

**COMMON BLUE DAMSELFLY:** *Present and breeds. Stronghold on the Valison Burn. Maximum numbers: 150 adults, 30 pairs copulating and 22 females ovipositing at Castle Loch and 20 adults, 5 pairs copulating and 3 females ovipositing at Hightae Loch (AR).*

**AZURE DAMSELFLY:** *Present and breeds. Stronghold on the Valison Burn. Maximum numbers: 40 adults, 22 pairs copulating and 21 females ovipositing at Castle Loch and 18 adults, 4 pairs copulating and 2 females ovipositing at Hightae Loch (AR&SJ).*

**VARIABLE DAMSELFLY:** *Present and breeds. Stronghold on the Valison Burn. Maximum numbers: 19 adults, 4 pairs copulating and 2 females ovipositing at Castle Loch. No sightings at Hightae Loch this year.*

**EMERALD DAMSELFLY:** *Present and probably breeds. No sightings at either loch in 2009.*

**COMMON DARTER:** *Present and probably breeds. Maximum numbers: 3 adults and 2 females ovipositing at Castle Loch. No sightings at Hightae Loch this year.*

**FOUR-SPOTTED CHASER:** *Present and may breed. Maximum numbers: 1 adult at Castle Loch and 3 adults at Hightae Loch (AR).*

**COMMON HAWKER:** *Present and probably breeds. Maximum numbers: 5 adults and 2 pairs copulating at Castle Loch and 3 adults and 2 pairs copulating at Hightae Loch (AR).*

**MIGRANT HAWKER:** *Present since 2004. No sightings in 2009.*

## **HOVERFLIES.**

**SCAEVA PYRASTRI:** *Present and probably breeds. Seen from 18<sup>th</sup> May to 27<sup>th</sup> September at Castle Loch and 24<sup>th</sup> May to 29<sup>th</sup> August at Hightae Loch. Maximum numbers: 9 at Castle Loch and 2 at Hightae Loch. (AR).*

**HELOPHILUS PENDULUS:** *Present and probably breeds. Seen from 18<sup>th</sup> May to 4<sup>th</sup> September at Castle Loch and 8<sup>th</sup> June to 19<sup>th</sup> September at Hightae Loch. Maximum numbers: 9 at Castle Loch and 5 at Hightae Loch (AR).*

**ERISTALIS TENAX:** *Present and probably breeds. Seen from 5<sup>th</sup> May to 28<sup>th</sup> September at Castle Loch and 24<sup>th</sup> May to 12<sup>th</sup> September at Hightae Loch. Maximum numbers: 9 at Castle Loch and 8 at Hightae Loch (AR).*

**ERISTALIS PERTINAX:** *Present and probably breeds. Seen from 5<sup>th</sup> May to 12<sup>th</sup> September at Castle Loch and 24<sup>th</sup> May to 14<sup>th</sup> September at Hightae Loch. Maximum numbers: 8 at Castle Loch and 9 at Hightae Loch (AR).*

**EPISYRPHUS BALTEATUS:** *Present and may breed. Seen from 5<sup>th</sup> June to 12<sup>th</sup> September at Castle Loch and 8<sup>th</sup> June to 12<sup>th</sup> September at Hightae Loch. Maximum numbers: 9 at Castle Loch and 4 at Hightae Loch (AR).*

## **BUTTERFLIES.**

**SMALL WHITE:** *Maximum numbers 4 (AR).*

**LARGE WHITE:** *Maximum numbers 4 (AR).*

**GREEN-VEINED WHITE:** *Maximum numbers 14 (AR).*

**ORANGE TIP:** *Maximum numbers 10 (AR).*

**PEACOCK:** *Maximum numbers 5 (AR).*

**SMALL TORTOISESHELL:** *Maximum numbers 4 (AR).*

**RED ADMIRAL:** *Maximum number 2 (AR).*

**RINGLET:** *Maximum number 1 (AR).*

**PAINTED LADY:** *Maximum number 200 (AR&SJ).*

**COMMA:** *One seen at Hightae Loch on 17<sup>th</sup> March (AW). A first record for the reserve and a rarity in the region.*

## **BIRDS.**

**RED-THROATED DIVER:** *Rare winter visitor. Last recorded 12<sup>th</sup> November 1972.*

**BLACK-THROATED DIVER:** *Rare winter visitor. Last recorded 21<sup>st</sup> March 1984.*

**GREAT NORTHERN DIVER:** *Very Rare. No previous records. First record seen at Castle Loch on 17<sup>th</sup> November 2008 (CB). Seen thereafter by a number of observers until the end of the month.*

**LITTLE GREBE:** *Recorded most years but no evidence of breeding. Maximum count of 4 at Castle Loch (AR) and 2 at Hightae Loch (AR).*

**GREAT CRESTED GREBE:** *Regular breeder. First bred at Lochmaben in 1891. Maximum count of 12 adults with 6 young (AR) .*

**RED-NECKED GREBE:** *Rare winter visitor. Last recorded 6<sup>th</sup> April 1992.*

**SLAVONIAN GREBE:** *Rare autumn/winter or early spring visitor. Last previous record 15<sup>th</sup> December 2004. One first seen on 13<sup>th</sup> October (BH). Seen thereafter by numerous observers until 12<sup>th</sup> November.*

**BLACK-NECKED GREBE:** *Rare winter and summer visitor. Last recorded 6<sup>th</sup> October 1996.*

**PIED-BILLED GREBE:** *Rare American vagrant. One record 24-25<sup>th</sup> April 1981.*

**GREAT CORMORANT:** *Common resident. Last breeding records 1898-1903 (Sir Hugh Gladstone). Maximum count of 20 on 6<sup>th</sup> March (BH).*

**EURASIAN BITTERN:** *Rare vagrant. Unconfirmed report of four on 29<sup>th</sup> January 2006 (Birdline Scotland). Possible sighting on 6<sup>th</sup> December 2006 when a bird took off from shallow water amongst willows but was immediately lost to view (RM). Report (via TR) of a Northumbrian birder having "good views" of 2 birds in the reeds by the yacht club on 18<sup>th</sup> January 2008. Further possible sighting on 23<sup>rd</sup> June 2008 with a bird taking off from the reeds on the west side of Castle Loch but again being immediately lost to view (AR & DW).*

**GREY HERON:** *Regular Visitor.*

**PURPLE HERON:** *Rare vagrant. One record only 27<sup>th</sup> May 1975 at Hightae Loch.*

**MUTE SWAN:** *Regular breeder. Highest count 102 adults on 5<sup>th</sup> July (AR).*

**BEWICK'S SWAN:** *Rare winter visitor. Last recorded 20<sup>th</sup> January 1995.*

**WHOOPEE SWAN:** *Irregular winter visitor. Maximum count of 9 on 6<sup>th</sup> January and 12 on 23<sup>rd</sup> October (both BH).*

**BEAN GOOSE:** *Rare winter visitor. Last recorded 23-25<sup>th</sup> February 1983.*

**PINK-FOOTED GOOSE:** *Regular winter visitor, though numbers have declined in recent years. The decline continued this year. More roost counts needed to establish situation (AR).*

**WHITE-FRONTED GOOSE:** *Rare winter visitor. Last recorded 16<sup>th</sup> February 1992.*

**GREYLAG GOOSE:** *Regular winter visitor. 2 pairs seen regularly throughout the year by a number of observers. No signs of successful breeding. Maximum counts of Icelandic birds: 36 on 20<sup>th</sup> September and 19 on 18th December (both AR). Roost is declining markedly.*

**SNOW GOOSE:** *Rare winter vagrant and uncommon escapee from wildfowl collections. Last recorded 14<sup>th</sup> October 1990.*

**BAR-HEADED GOOSE:** *Asiatic introduction. Now feral. One record of 11 birds on two dates in August 2001 (PSh).*

**CANADA GOOSE:** *North American introduction, now a common U K resident. Occurs throughout the year and is an irregular breeder on the reserve. Maximum count: 150.*

**HYBRID GEESE (GREYLAG x CANADA GOOSE):** *Single hybrid seen frequently throughout 2008. Last seen on 13<sup>th</sup> February (BH).*

**BRENT GOOSE:** *Rare winter visitor. Last recorded 12<sup>th</sup> January 2004.*

**BARNACLE GOOSE:** *Occasional winter visitor.*

**COMMON SHELDUCK:** *Irregular breeder, usually one or two pairs only. Last recorded breeding 2007. No signs of successful breeding on the reserve this year probably due to flooding within the sanctuary zone during the season.*

**RUDDY SHELDUCK:** *Accidental from Asia or north-west Africa, or uncommon escapee from a wildfowl collection. One record 27<sup>th</sup> April 2004 (AR).*

**EURASIAN WIGEON:** *Regular winter visitor, scarce in summer. Numbers higher at the Kirk Loch in the early part of the year possibly due to disturbance at Castle Loch. Maximum count of 149 on 19<sup>th</sup> January (AR).*

**AMERICAN WIGEON:** *Accidental from North America or escapee from wildfowl collection. Male present at Castle Loch and sometimes Kirk Loch between early October and Mid December (BH). Previous record (unconfirmed ) 2003.*

**GADWALL:** *Occasional winter visitor or during spring passage. Maximum count of 4 on 30th March (BH).*

**COMMON TEAL:** *Regular winter visitor. Maximum count of 350 on 16<sup>th</sup> January (JM).*

**GARGANEY:** *Rare summer visitor. Last previous records 15<sup>th</sup> September 1991, 3<sup>rd</sup> June 2003 5<sup>th</sup> May 2006 and a single drake seen by numerous observers between 28<sup>th</sup> February and 30th March 2008. This bird was noted to have a yellow ring on the right leg (R&BM). This and the time of its arrival (rather early for a migrant) suggest that it might not have been a wild bird. A further sighting of probably the same bird on 16<sup>th</sup> April (JB & G Garner).*

**MALLARD:** *Regular throughout the year. Numbers peaking at 420 on 5<sup>th</sup> July (AR).*

**NORTHERN PINTAIL:** *Irregular winter visitor. Maximum count of 36 on 23<sup>rd</sup> October (BH).*

**NORTHERN SHOVELER:** *Irregular visitor, winter and spring. Maximum count of 6 on 23<sup>rd</sup> October (BH).*

**RED-CRESTED POCHARD:** *Rare vagrant and uncommon escapee from wildfowl collections. Last recorded 9<sup>th</sup> September 1995.*

**COMMON POCHARD:** *Irregular winter visitor. Maximum count of 5 on 18<sup>th</sup> November (BH).*

**TUFTED DUCK:** *Present throughout the year. Maximum count of 112 on 19<sup>th</sup> January (AR).*

**GREATER SCAUP:** *Very occasional winter visitor. Last previous record single female at Hightae Loch 16<sup>th</sup> January 2006 (RM). Single male at Castle Loch. First seen on 6<sup>th</sup> March (BH) and thereafter by various observers until the end of the month.*

**LESSER SCAUP:** *Rare transatlantic vagrant. Last recorded 26<sup>th</sup> January 2004 (IA). Bird with superficial appearance of Lesser Scaup seen by a number of observers in 2008. This appears to have been a hybrid although its exact nature has not been determined.*

**LONG-TAILED DUCK:** *Rare winter visitor. Last previous records 24<sup>th</sup> December 1994, 6<sup>th</sup> November-15<sup>th</sup> December 2002, 23<sup>rd</sup> January 2003, 8<sup>th</sup> and 12<sup>th</sup> December 2005 and 11<sup>th</sup> January-12<sup>th</sup> April 2006. Two birds present during the latter half of February 2008 and then again from 17<sup>th</sup> November until the end of the year. In 2009 one male present between 14<sup>th</sup> January and 28<sup>th</sup> February (BH) and a number of observers. One female first seen on 15<sup>th</sup> November (BH) and thereafter by a number of observers until 16<sup>th</sup> December.*

**COMMON SCOTER:** *Scarce visitor. Last record at Castle Loch on 13<sup>th</sup> March 2006 (RM).*

**VELVET SCOTER:** *Rare visitor. One record 18<sup>th</sup> October 2000.*

**COMMON GOLDENEYE:** *Regular winter visitor, sometimes remaining well into summer. Maximum count 32. Last birds had left by 22<sup>nd</sup> March and first arrivals seen on 9<sup>th</sup> October.*

**SMEW:** *Seen most winters in small numbers. First sighting of 3 on 14<sup>th</sup> January (BH). Seen thereafter by a number of observers. Maximum count: 4 on 5<sup>th</sup> February. Last sighting: 1 on the 28<sup>th</sup> February.*

**RED-BREASTED MERGANSER:** *Fairly regular in winter. Probably slightly under-recorded.*

**GOOSANDER:** *Regular winter visitor. Breeds locally. Maximum count: 29 on 14<sup>th</sup> December (BH).*

**RUDDY DUCK:** *North American introduction. Occasional visitor. Last record is a pair at Castle Loch on 16<sup>th</sup> January 2006 (RM).*

**RED KITE:** *Rare vagrant. One record Hightae Loch early 1990s (FSed).*

**MARSH HARRIER:** *Scarce summer visitor. Last recorded 20<sup>th</sup> May 1984 at Hightae Loch.*

**HEN HARRIER:** *Scarce visitor. Last recorded 2<sup>nd</sup> March 1990.*

**NORTHERN GOSHAWK:** *Scarce local breeder. Last previous record one flew over Castle Loch from the west, circled and then returned west on 17<sup>th</sup> March 2008 (AW).*

**EURASIAN SPARROWHAWK:** *Resident, probably breeds in woodland on reserve. Seen regularly at both lochs by a variety of observers.*

**COMMON BUZZARD:** *Resident, has bred in woodland on reserve. Seen regularly at both lochs by a variety of observers. There appear to be 2 pairs now using the area this year. One based in woodland to the East and the other in Castle Wood (AR).*

**ROUGH-LEGGED BUZZARD:** *Rare winter visitor. Last recorded at Hightae Loch February 2004 (FSe).*

**OSPREY:** *Occasional on passage, spring and autumn. Last recorded June 2009 (AR).*

**KESTREL:** *Resident breeder. Seen regularly over sanctuary zone by a variety of observers.*

**MERLIN:** *Scarce visitor. Last recorded 8<sup>th</sup> April 2005 (but probably under-recorded).*

**HOBBY:** *Rare summer visitor. One record 17-18<sup>th</sup> July 1982.*

**PEREGRINE:** *Occasional winter visitor. Last previous record 2004. One seen on 16<sup>th</sup> May hunting towards Hightae Loch (BH).*

**RED-LEGGED PARTRIDGE:** *Sometimes reared and released in area. Last recorded 18<sup>th</sup> April 1997.*

**GREY PARTRIDGE:** *Declining farmland resident. Last recorded 1991.*

**COMMON PHEASANT:** *Resident breeder. Bred in Castle Wood.*

**WATER RAIL:** *Regular winter visitor but breeding has only rarely been confirmed.*

**SPOTTED CRAKE:** *Very rare breeder in UK. Only record 26<sup>th</sup> August 2001 at Hightae Loch (PSh).*

**CORN CRAKE:** *Former resident breeder? Last recorded 1<sup>st</sup> and 2<sup>nd</sup> August 1980 (PSH and Dugald Black).*

**MOORHEN:** *Resident breeder, in small numbers. Three young seen on a number of dates in June and July (AR).*

**EURASIAN COOT:** *Winter visitor. Small numbers breed. Maximum count 65.*

**AMERICAN COOT:** *Rare American vagrant. One record 10-17<sup>th</sup> February 2004 (AW).*

**OYSTERCATCHER:** *Irregular visitor in spring and autumn, sometimes breeds in or near reserve.*

**LITTLE RINGED PLOVER:** *Scarce summer visitor to Scotland. One record 18<sup>th</sup> May 1996 (RM).*

**RINGED PLOVER:** *Occasional passage migrant. Last recorded March and July 2005.*

**GOLDEN PLOVER:** *Occasional passage migrant. None on reserve since 8<sup>th</sup> September 1995. Large flocks still regular at Greenhill, near River Annan, where 650 on 5<sup>th</sup> April 2006 (PSh).*

**NORTHERN LAPWING:** *Irregular visitor in spring and autumn, sometimes breeding on or near the reserve. Serious decline in numbers in recent years.*

CURLEW SANDPIPER: *Rare passage migrant. One record 8<sup>th</sup> September 1999 at Hightae Loch (RM).*

DUNLIN: *Scarce passage migrant. Seen very occasionally, last recorded 10<sup>th</sup> May 1999, 29<sup>th</sup> April and 20<sup>th</sup> July 2003 with eleven birds seen on the latter date.*

RUFF: *Scarce passage migrant. Very occasional, last recorded several autumn dates in 1995.*

JACK SNIBE: *Scarce winter visitor. Last recorded 9<sup>th</sup> March 1986.*

**COMMON SNIPE: *Common passage migrant and local breeder.***

WOODCOCK: *Occasional breeder and winter visitor. Last recorded roding 27<sup>th</sup> March 1990. Single records at both lochs in March 2004.*

BLACK-TAILED GODWIT: *Scarce passage migrant. Last recorded 29<sup>th</sup> August to 1<sup>st</sup> September 2005.*

BAR-TAILED GODWIT: *Scarce passage migrant. Last recorded 21<sup>st</sup> October 1983.*

WHIMBREL: *Scarce passage migrant. Last recorded 9<sup>th</sup> May 2006 (RM).*

**CURLEW: *Regular passage migrant, sometimes in large numbers in spring. Breeds locally.***

SPOTTED REDSHANK: *Uncommon passage migrant. Last recorded 26<sup>th</sup> August 2001 (PSh).*

COMMON REDSHANK: *Irregular visitor to the reserve, usually in spring. Last records singles on 13<sup>th</sup> March 2006 and 13<sup>th</sup> July 2006 (RM).*

COMMON GREENSHANK: *Uncommon passage migrant. Last recorded 2<sup>nd</sup>-3<sup>rd</sup> September 2005.*

GREEN SANDPIPER: *Uncommon passage migrant. Last recorded 21<sup>st</sup> October 1994.*

WOOD SANDPIPER: *Rare passage migrant. Last record 3<sup>rd</sup> September 2005.*

**COMMON SANDPIPER: *Uncommon passage migrant, local breeder. One at Castle Loch between 21<sup>st</sup> July and 2<sup>nd</sup> August (BH).***

ARCTIC SKUA: *Rare passage migrant. Last recorded 8<sup>th</sup> October 1995.*

GREAT SKUA: *Rare passage migrant. Last recorded 27<sup>th</sup> April 1999.*

LITTLE GULL: *Scarce passage migrant. Last recorded 20<sup>th</sup> March 2004.*

**BLACK-HEADED GULL: *Common winter visitor; breeds locally. Maximum daytime count 110. Winter roost irregular but building.***

MEDITERRANEAN GULL: *Rare vagrant. One record 15<sup>th</sup> March 2003 (Birdguides).*

**COMMON GULL: *Mainly a winter visitor, in large numbers amongst other gulls in winter roost.***

**LESSER BLACK-BACKED GULL: *Most birds migrate south in winter. Usually at least one or two birds present throughout the year. Maximum count: 27 on 16<sup>th</sup> September (BH).***

**HERRING GULL:** *Seen regularly in small numbers, breeds locally.*

**GLAUCOUS GULL:** *Rare winter visitor. Last previous records 25<sup>th</sup> February 1974 and 11<sup>th</sup> January 1984 and first winter bird at Castle Loch 17 November 2008 (CB).*

**ICELAND GULL:** *Rare winter visitor. One record 25<sup>th</sup> February 1974.*

**GREAT BLACK-BACKED GULL:** *Scarce local resident, seen occasionally. Last previous record 4 at Castle Loch on 15<sup>th</sup> February 2006. One at Castle Loch on 23<sup>rd</sup> December 2009 (R&BM).*

**KITTIWAKE:** *Rare visitor. Last recorded 10<sup>th</sup>-15<sup>th</sup> January 1984.*

**COMMON TERN:** *Occasional on passage. Last recorded 19<sup>th</sup> August 2001, 26<sup>th</sup> August 2003 and 8-10 October 2006.*

**ARCTIC TERN:** *Occasional on passage. Last recorded 26<sup>th</sup> September 2003.*

**BLACK TERN:** *Fairly frequent on spring and autumn passage, most often seen second week of May to first week of June, and late August to early September. Last previous records 7<sup>th</sup> September 1998 and a single at north end of Castle Loch from 8<sup>th</sup> –10<sup>th</sup> October 2006 (SG, RM). One at Castle Loch 16<sup>th</sup> May (BH) and other observers.*

**SANDWICH TERN:** *Rare visitor. One record only 6<sup>th</sup> September 1973.*

**COMMON GUILLEMOT:** *Rare vagrant. Last recorded 26<sup>th</sup> December 1987 (2 birds).*

**LITTLE AUK:** *Rare vagrant. Last recorded mid to late 1980s.*

**ROCK DOVE/FERAL PIGEON:** *Common local resident in and around farms and towns. Occasional visitor to reserve.*

**STOCK DOVE:** *Resident breeder.*

**WOOD PIGEON:** *Regular breeder in the woods at both lochs.*

**COLLARED DOVE:** *Common local resident in and around farms and towns.*

**COMMON CUCKOO:** *Scarce summer visitor. Last recorded 10<sup>th</sup> May 2002.*

**BARN OWL:** *Scarce visitor, former breeder. Last previous definite record February to March 1985. One seen in Castle Loch Woodland on 6<sup>th</sup> February (RG) and thereafter by various observers. Last reported sighting on 6<sup>th</sup> July.*

**TAWNY OWL:** *Resident regular breeder.*

**LONG-EARED OWL:** *Irregular visitor. Last recorded at Hightae Loch 28<sup>th</sup> October 1978 (PSh).*

**SHORT-EARED OWL:** *Rare visitor. Last recorded 28<sup>th</sup> November 1985.*

**COMMON SWIFT:** *Common summer visitor, breeds in Lochmaben.*

**COMMON KINGFISHER:** *Regular visitor, breeds locally.*

EUROPEAN GREEN WOODPECKER: *Scarce resident locally. Last recorded 31<sup>st</sup> May 1984.*

**GREAT SPOTTED WOODPECKER:** *Resident regular breeder.*

**EURASIAN SKYLARK:** *Irregular visitor.*

**SAND MARTIN:** *Regular visitor in spring and summer: breeds in banks of River Annan and at Applegarthtown Wildlife Sanctuary. First sighting of 200 24<sup>th</sup> March (BH). Maximum count: 250 on 5<sup>th</sup> May (JT).*

**BARN SWALLOW:** *Summer visitor, breeds locally.*

**HOUSE MARTIN:** *Summer visitor, breeds locally.*

**TREE PIPIT:** *Scarce summer visitor.*

**MEADOW PIPIT:** *Irregular visitor. No recent breeding records for the reserve. Last recorded 2003.*

**YELLOW WAGTAIL:** *Rare summer visitor. Last recorded 25<sup>th</sup> September 1981.*

**GREY WAGTAIL:** *Common local resident but irregular visitor to the reserve.*

**PIED WAGTAIL:** *Irregular visitor and breeder. Pair with 3 young seen at Sailing Club (AR).*

**WHITE WAGTAIL:** *Last recorded 28<sup>th</sup> April 1995.*

**BOHEMIAN WAXWING:** *Irregular, rare winter visitor. Last previous record 15 by Lochmaben Kirk on 17<sup>th</sup> November 2008.*

**WREN:** *Present throughout the year and breeds at both sites.*

**DUNNOCK:** *Present throughout the year and breeds at both sites.*

**ROBIN:** *Present throughout the year and breeds at both sites.*

**COMMON REDSTART:** *Scarce summer visitor and occasional breeder on the reserve. No records this year.*

**WHINCHAT:** *Scarce summer visitor. Last recorded 10<sup>th</sup> May 1982.*

**COMMON STONECHAT:** *Scarce local resident. No record for the reserve.*

**NORTHERN WHEATEAR:** *Occasional passage migrant. Last recorded 2<sup>nd</sup> June 1991.*

**BLACKBIRD:** *Resident throughout the year and breeds at both sites.*

**FIELDFARE:** *Regular autumn and winter visitor.*

**SONG THRUSH:** *Present throughout the year and breeds at both sites.*

**REDWING:** *Regular autumn and winter visitor.*

**MISTLE THRUSH:** *Recorded in most years, breeds locally. No 2001 or 2002 records. A few records in 2003, 2004 and 2005. No reports for 2006, 2007 or 2008. Maximum count in 2009: 8 on 5<sup>th</sup> November.*

**GRASSHOPPER WARBLER:** *Summer visitor and irregular breeder. Last recorded on two spring dates in 1997.*

**SEDGE WARBLER:** *Summer visitor and regular breeder at both lochs.*

**REED WARBLER:** *Summer visitor and recent breeder.*

**COMMON WHITETHROAT:** *Scarce summer visitor. Last recorded 12<sup>th</sup> August 1996.*

**GARDEN WARBLER:** *Summer visitor and breeder.*

**BLACKCAP:** *Summer visitor and breeder.*

**WOOD WARBLER:** *Scarce summer visitor. Occasional in spring. Last recorded 25<sup>th</sup> July and 5<sup>th</sup> August 2003.*

**CHIFFCHAFF:** *Regular spring and autumn migrant, occasional breeder.*

**WILLOW WARBLER:** *Summer visitor and regular breeder.*

**GOLDCREST:** *Present throughout the year and probable breeder at both sites.*

**SPOTTED FLYCATCHER:** *Irregular summer visitor and occasional breeder. Last previous record Castle Loch 25<sup>th</sup> August 2006 (RM). Three at Castle Loch on 4<sup>th</sup> June (MG) and single at Hightae Loch on 13<sup>th</sup> May (JM).*

**PIED FLYCATCHER:** *Scarce summer visitor. Last recorded 9<sup>th</sup> August 1993.*

**LONG-TAILED TIT:** *Resident and probable regular breeder.*

**WILLOW TIT:** *Resident and regular breeder. Seen by a number of observers throughout the year. Breeding survey to be carried out in 2010 (AR & RG).*

**COAL TIT:** *Present throughout the year and probably breeds at both sites.*

**BLUE TIT:** *Present throughout the year and probably breeds at both sites.*

**GREAT TIT:** *Present throughout the year and probably breeds at both sites.*

**EURASIAN NUTHATCH:** *Increasingly numerous resident in Dumfries and Galloway, having spread westwards from Cumbria and the Scottish Borders during the 1990s. First reserve record near the castle on 21<sup>st</sup> April 2003 (PSed).*

**COMMON TREECREEPER:** *Present throughout the year and probably breeds at both sites.*

**JAY:** *Resident and may breed on the reserve.*

**MAGPIE:** *Rare vagrant. Last recorded 24<sup>th</sup> March 1978.*

**JACKDAW:** *Resident breeder, supplemented by larger numbers coming to winter roost.*

**ROOK:** *Sporadic resident breeder supplemented by larger numbers coming to winter roost.*

**CARRION CROW:** *Resident breeder supplemented by larger numbers coming to winter roost.*

HOODED CROW: *Last recorded 1981.*

COMMON RAVEN: *Occasional visitor. Last record two birds overflying 2<sup>nd</sup> October 2008 (RG).*

**COMMON STARLING:** *Winter visitor and local breeder. The roost in the reeds around Vendace Bay is building up again. Maximum count: 5000 (AR).*

ROSE-COLOURED STARLING: *Rare Eurasian vagrant. One record late October 2003.*

HOUSE SPARROW: *Common resident in Lochmaben and at surrounding farms. Irregularly recorded on reserve.*

EURASIAN TREE SPARROW: *Scarce and declining resident on local farmland. Last recorded 1984.*

**COMMON CHAFFINCH:** *Present throughout the year and bred at both sites.*

BRAMBLING: *Irregular winter visitor. No reports this year.*

**EUROPEAN GREENFINCH:** *Present throughout the year, probably breeds.*

EUROPEAN GOLDFINCH: *Occasional visitor. Probably breeds in some years.*

**EURASIAN SISKIN:** *Winter visitor and passage migrant.*

EUROPEAN LINNET: *Scarce resident locally. Last recorded 30<sup>th</sup> August and 29<sup>th</sup> December 2003.*

LESSER REDPOLL: *Resident in wider vicinity, irregular on the reserve.*

COMMON CROSSBILL: *Irregular visitor. Probable breeder in conifer forests in vicinity. Last recorded 27<sup>th</sup> May 2003.*

**EURASIAN BULLFINCH:** *Irregular. May breed occasionally.*

YELLOWHAMMER: *Used to be a regular resident breeder. Last recorded 2003.*

**COMMON REED BUNTING:** *Regular resident breeder.*

CORN BUNTING: *Rare visitor (and now extremely rare resident in D&G). Recorded 26<sup>th</sup> February and 6<sup>th</sup> May 1978 at Castle Loch and at Hightae Loch on 2<sup>nd</sup> February 1980 (all records PSh).*
